

Docket # 98N-1038
Irradiation in the production, processing and
handling of food.
FDA

I am writing to state that I want food #7256 to be irradiated to be labeled. Consumers should be able to choose whether they want their food irradiated. DR Marcia Van Gemert testified in 1993 that of the 441 studies that were reviewed all were flawed. I would like to see the FDA conduct truly independent studies and not rely on the industries that stand to profit from food irradiation. This is nothing more than human experimentation.

Thank you
